Paula,

As for the ARSG meeting in April, at this time, I am not planning on attending the April meeting. DRMS (Allen) and I discussed our schedules and he is likely not available at that time. I will contact Peter regarding this tomorrow. Our plan is to give the group a presentation in May on the R n B design, etc.

As for the other items listed below, I believe that we had a rather long discussion with several of us last month regarding the monitoring and Gold King and bulkhead plans. We can certainly get together again to firm things up, but we have plenty of time. I am not available on April 2; I will be at a meeting out of the office / giving a presentation.

We can connect next week if you're around.

Steve

Subject: Red-Bonita & ARSG

Steve – I spoke to Peter Butler today and he is planning quite an agenda for the April ARSG meeting on Tuesday April 28th – one of them being the Red Bonita. He asked if you would be coming to the meeting. He explained that he was thinking that the meeting would be both in the afternoon and in the evening with a break for dinner since he thinks there will be a lot to discuss with the draft BERA and other items.

He asked for a few things about the Red Bonita project.

- The planned schedule for construction, etc.
- Are we planning on a pipe into the tunnel for the possible injection of lime or other treatment?
- The plans for the Gold King
- Monitoring of impacts once the bulkhead is installed.

Dan, Liz and I would be very interested in talking with you about the plans – especially with regard to monitoring and how it might fit in with our field monitoring plans for 2015.

We have just set up weekly team meetings for Thursday afternoons from 2:00 – 3:00 pm. We will be meeting in the conference center or you can call in if you're not in the office. Can you join us this next Thursday, April 2nd for our team meeting?

Thanks

Paula Schmittiel
